PREPARED BY
Forest
Service

Southwestern
Region

This brochure describes programs that invite public participation in the enhancement and management of fish and wildlife habitats on National Forest Lands in New Mexico, Arizona, and Oklahoma. The Forest Service has initiated programs to encourage public participation in a variety of emphasis areas including fisheries, endangered species, and other wildlife.

The RISE TO THE FUTURE program includes cooperation from groups such as the Sport Fishing Institute, Trout Unlimited, the Fish America Foundation, and the angling public. This program emphasizes public education, enhanced fishing opportunities, and participation in fisheries habitat management on National Forest lands.

EVERY SPECIES COUNTS
is a newly conceived
emphasis encouraging
public involvement in
managing
habitats for a
variety of
threatened,
endangered and
sensitive fish,
wildlife and
plants.

ISE TO THE FUTURE

The Fishery Program
of the U.S. Forest Service

FOUR NATIONAL FORESTS

The GET WILD! program
attracts a broad spectrum
of public participation in
projects benefiting
various game and nongame
wildlife. Although
established with the help
of "Principal
Cooperators," the ten
"GET WILD!" programs
invite everyone to share in
project ideas, costs,
materials, or labor.
Choose an area of interest
and take part in the
management of wildlife and
wildlands of National
Forest lands in New
Mexico, Arizona and
Oklahoma!

CATALOGING PREP.

Get Wild!

ANIMAL INN

Promoting the value of dead and dying trees as wildlife habitat.

EYES ON WILDLIFE
Promotion of non-consumptive recreational and educational opportunities such as bird watching, nature study and photography.

ANSWERING THE CALL
Maintenance and improvement of habitat for quail.

DANCERS IN THE FOREST
Restoration and improvement of habitat for woodcock, sharp-tailed grouse, blue grouse, sage grouse, prairie chicken, and associated species.

FULL CURL
Improved habitats for Rocky Mountain and desert bighorn sheep.

A MILLION BUCKS
Habitat management and enhancement to benefit native deer populations.

MAKING TRACKS
Improved habitats and increased populations of wild turkey.

TAKING WING
Enhanced habitats and increased populations of waterfowl in coordination with the North American Waterfowl Management Plan.

ELK COUNTRY
Expansion and improvement of elk habitat on National Forest Lands.

BEAR HABITAT
Enhanced habitats for black bear on National Forests.

WHAT CAN I DO?

Whether you're an individual, a member of a local club or civic organization, or an employee of a state or federal agency, you can become a partner in improving fisheries and wildlife habitat on your National Forests and Grasslands. All that's required is interest and a commitment to make good things happen. Your contributions of project ideas, plans, money, labor, equipment, or technical skills will be used to benefit wildlife and their habitats.

HOW DO I GET INVOLVED?

If you're interested in projects to enhance fisheries and wildlife populations or habitats on National Forests in Arizona or New Mexico, contact the Forest Biologist at the phone numbers listed below with your ideas and questions. Ask for a copy of the "Join Us" brochure for a description of the Forest Service Partnerships Program, or for other information concerning species or habitats of interest!
